

### **What is changing with Medical Terminology?**

New enhancements will be added to the Medical Terminology products as of August 7, 2024, and will impact any new courses started after this date.

You'll now have access to new features including:

- ***Interactive Tour*** to familiarize you with how to use the product, located under "Help"
- ***Annotation Tools*** including bookmarking, highlighting, and note taking capabilities
- ***Progress completion bar*** in the main menu will show how far a learner has progressed through a particular lesson
- ***Interactive BioDigital Learning Models*** - embedded throughout modules to provide an interactive learning resource with an added 3D visual component to reinforce learning.
- ***Centralized Video Library*** provides a convenient review of all videos presented throughout a module

### **Does this change impact the End of Module quizzes or reporting capabilities?**

No, this format change does not impact the End of Module Quizzes or any reports.

### **Does this update include any changes to the content within either of these products?**

There are no changes to the content itself within the Medical Terminology product. Only the format in which the content is presented will be updated.

### **Why is the experience changing for the Medical Terminology?**

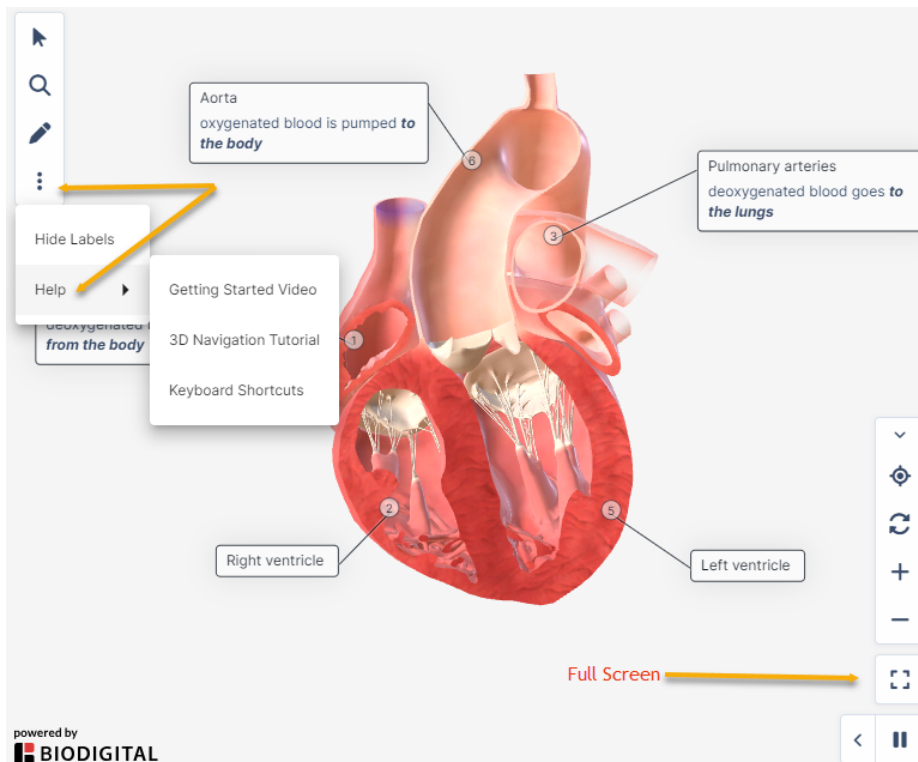

This change will provide a cohesive learning experience across the NHA product line.

## How do I use the new BioDigital Interactive Learning Models?

Each BioDigital 3D learning model can be manipulated by using either a mouse, keyboard, or touchscreen. Each model also offers a Help feature where learners may access the Getting Started Video, 3D Navigation Tutorial, and Keyboard shortcuts. It is recommended that the learner enter full screen mode to get the most benefit from the learning model. For reference, both the Help and full screen mode are indicated in the image below.

Additional help can be found here:

## What do I need to do after August 7 when these enhanced product launch?

You don't have to do anything, but as an instructor/facilitator please be aware of the following:

- Any course that has already been started with an active learner in the course will have no impact. Learners will continue to use the product they were enrolled in.
- NHA will automatically move any existing unused or unassigned inventory over to the new product version on August 7, 2024.
- Instructors/facilitators can add new learners to an existing course with the original product version (if inventory is available) up until September 4th – please connect with your NHA representative for assistance.
- Beginning August 7, any new courses created should use the new enhanced version of the product.

**What will happen to my existing inventory?**

When the new version of the product becomes available on August 7<sup>th</sup>, all unassigned or unused inventory will automatically be moved over to the new versions of the product. No action is needed on your part.

**What are the names of the current products and what are the names of the new enhanced products?**

Current Product Name	Enhanced/New Product Name
Medical Terminology	Medical Terminology 2.0

On August 7<sup>th</sup> the current product “Medical Terminology” will no longer be available to add to new courses.

**What happens to my existing courses where I have learners actively using the products?**

- Learners that are enrolled in a course will experience no impact and can continue using the current product.
- Instructors/facilitators can add new learners to an existing course with the original product version (if inventory is available) up until September 4<sup>th</sup> - please connect with your NHA representative for assistance.
- When possible, new learners should be put into a new course created with the updated (2.0) materials for the best learning experience.

**When I create a new course, which version of the product should I select?**

Beginning August 7, only the new versions of the products will be available when you create a new course. Any unused/unassigned inventory will be moved to the new products August 7<sup>th</sup> and will be reflected in your inventory.

- Instructors/facilitators can add new learners to an existing course with the original product version (if inventory is available) up until September 4<sup>th</sup> - please connect with your NHA representative for assistance.

The following are the names of the enhanced products to select:

- Medical Terminology 2.0

If you have questions about adding a learner to an existing course, please reach out to your account representative.
